Legal Knowledge and Information Systems E. Francesconi,G. Borges,C. Sorge,2022-12-21 In recent years, interest within the research community and the legal industry regarding technological advances in legal knowledge representation and processing has been growing. This relates to areas such as computational models of legal reasoning, cybersecurity, privacy, trust and blockchain methods, among other things. This book presents the proceedings of JURIX 2022, the 35th International

Conference on Legal Knowledge and Information Systems, held from 14 -16 December in Saarbrücken, Germany, under the auspices of the Dutch Foundation for Legal Knowledge Based Systems and hosted by Saarland University. The annual JURIX conference has become an international forum for academics and professionals to exchange knowledge and experiences at the intersection of law and artificial intelligence (AI). For this edition, 62 submissions were received from 163 authors in 24 countries. Following a rigorous review process, carried out by a programme committee of 72 experts recognised in the field, 14 submissions were selected for publication as long papers, 22 as short papers and 5 as demo papers, making a total of 41 papers altogether and representing a 22.5% acceptance rate for long papers (66.1% overall). The broad array of topics covered includes argumentation and legal reasoning, legal ontologies and the semantic web, machine and deep learning and natural language processing for legal knowledge extraction, as well as argument mining, translation of legal texts, defeasible logic, legal compliance, explainable AI, alternative dispute resolution, legal drafting and smart contracts. Providing an overview of recent advances, the book will be of interest to all those working at the interface between the law and AI.

Entering the Brazilian Market: A Guide for LEAN Consultants Kristina Erikson,2009-11 Especially during the last two decades consulting companies established themselves in the international marketplace. In times of globalization particularly emerging economies, such as Brazil, are experiencing an upward trend and join the global players. The term LEAN consulting became frequently used in this context and plays a major role in the Brazilian consulting market nowadays. This study develops recommendations for the market entry of management consulting companies into the Brazilian market. The implication of the term Lean in the context of the consulting business and its future potential in Brazil is examined, supported by an evaluation of the target market. The outcome of the theoretical part is then being compared with empirical findings which are conducted via a Delphi Study. The empirical part clearly identifies that the most promising strategy for doing business in Brazil is intensive networking and new ventures should enter the market only with professional support

from Brazilian partners who are more familiar with the peculiarities of the market. These and other interesting facts are delivered at the end of the study, providing a guide for new potential consulting businesses that want to enter the Brazilian LEAN market.
