*The Forests of the Congo Basin* Carlos de Wasseige, 2012 The 2010 State of the Forest report (SOF) benefited from financial support from the European Union, the United States, Germany, France and UNESCO. It represents the collaborative effort of over 100 individuals from a diversity of institutions and the forestry administrations of the Central African countries. The SOF process began with the selection and definition of indicators relevant to monitoring the state of forests in Central Africa. The indicators are structured around three thematic areas: (i) forest cover; (ii) management of production forests; and (iii) conservation and biodiversity. They are presented in a hierarchical structure at the regional, national and management unit (i.e. logging concessions and protected areas) levels. The indicators were vetted by a representative panel of stakeholders of forest management in Central Africa. The indicators are used to guide an annual data collection process carried out between April and August by national groups of four to ten individuals working within the forestry administrations. The data reported on in the 2010 SOF were primarily collected in 2009 and 2010. Results were validated in national workshops attended by government officials as well as representatives of environmental NGOs, the private sector and development projects. The data provided an important basis for the authors of the 11 chapters of the 2010 SOF, which were under the coordination of a scientific committee of international renown. A final workshop was held 29-30 March, 2011 in Douala to review a draft report. Following amendments based on comments from a wide audience of experts the final layout was completed.

**The Rights of Nature** Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature, Roderick Nash focuses primarily on changing attitudes toward nature in the United States. His work is the first comprehensive history of the concept that nature has rights and that American liberalism has, in effect,

been extended to the nonhuman world. “A splendid book. Roderick Nash has written another classic. This exploration of a new dimension in environmental ethics is both illuminating and overdue.”—Stewart Udall “His account makes history ‘come alive.’”—Sierra “So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history.”—Philip Shabecoff, New York Times Book Review “Clarifying and challenging, this is an essential text for deep ecologists and ecophiles.”—Stephanie Mills, Utne Reader

Politics of Oil and Nuclear Technology in Iran Akbar E. Torbat, 2020-02-19 This book focuses on oil politics and the development of nuclear technology in Iran, providing a broader historical context to understand Iran’s foreign relations and nuclear policy. The author assesses Iran's encounters with the West in light of major confrontations both in terms of open conflict as well as controversies surrounding treaties with foreign powers. In seeking to understand the geopolitics of oil in direct parallel to the geopolitics of nuclear technology, the book concentrates on Iran’s struggles to nationalize its oil, neo-colonialism, the formation of the oil consortium, and the more recent US backtracking on the nuclear deal with Iran.

*Advances in Human Resource Management in Asia* P. Banerjee, X. Li, F. Richter, John B. Kidd, 2001-05-23 Human resource management performs a different function and operates very differently in Asia to its practice in the US and Europe. This volume demonstrates how human resource management is enacted in Asian countries, how it is changing in response to recent economic events, and how firms are linking indigenous and external human resource management learning. Examples are taken from firms in Japan, China, Korea and Thailand, and these domestic approaches are then considered in the context of joint ventures. As well as providing a detailed analysis of Asian human resource management, contributors with perspectives from both the East and the West show how multinational firms can incorporate Asian thinking and acting into a modern business strategy for successful human resource development in international ventures.

*Eco-design of Marine Infrastructures* Sylvain Pioch, Jean-Claude Souche, 2021-10-26 This book offers an insight into how to create aesthetically pleasing, environmentally integrated, multi-functional developments in the ocean or on the coastline. Eco-design of Marine Infrastructures provides practical and realistic solutions for delivering projects that strive to minimize negative environmental impacts. Using case studies and examples, this book presents a toolkit of options, allowing decision makers and planners to see what is possible and to make informed choices about the risks and benefits of eco-design. It is intended for researchers, engineers, students and decision makers, or anyone who is curious to see how nature can be

integrated into development.

**Italy in the International System from Détente to the End of the Cold War** Antonio Varsori, Benedetto Zaccaria, 2017-11-10 This edited collection offers a new approach to the study of Italy's foreign policy from the 1960s to the end of the Cold War, highlighting its complex and sometimes ambiguous goals, due to the intricacies of its internal system and delicate position in the fault line of the East-West and North-South divides. According to received opinion, during the Cold War era Italy was more an object rather than a factor in active foreign policy, limiting itself to paying lip service to the Western alliance and the European integration process, without any pretension to exerting a substantial international influence. Eleven contributions by leading Italian historians reappraise Italy's international role, addressing three complex and intertwined issues, namely, the country's political-diplomatic dimension; the economic factors affecting Rome's international stance; and Italy's role in new approaches to the international system and the influence of political parties' cultures in the nation's foreign policy.

Understanding Global Cultures Martin J. Gannon, Rajnandini Pillai, 2015-02-16 In the fully updated Sixth Edition of Understanding Global Cultures: Metaphorical Journeys Through 34 Nations, Clusters of Nations, Continents, and Diversity, authors Martin J. Gannon and Rajnandini Pillai present the cultural metaphor as a method for understanding the cultural mindsets of individual nations, clusters of nations, continents, and diversity in each nation. A cultural metaphor is any activity, phenomenon, or institution that members of a given culture consider important and with which they identify emotionally and/or cognitively, such as the Japanese garden and American football. This cultural metaphoric approach identifies three to eight unique or distinctive features of each cultural metaphor and then discusses 34 national cultures in terms of these features. The book demonstrates how metaphors are guidelines to help outsiders quickly understand what members of a culture consider important.

**States, Actors and Geopolitical Drivers in the Mediterranean** Francesca Maria Corrao, Riccardo Redaelli, 2021-09-20 Moving from a historical and cultural perspective, this book examines the geo-political and socio-economic changes involving the enlarged Mediterranean. Organised into two main sections, the first section (The new centrality of the Mediterranean Basin: Trends and Dynamics) is devoted to the analysis of the most relevant drivers and interdisciplinary broader issues, and the second section (Hotspots of Crisis and Regional Interferences in the Mediterranean) assesses the situation in some areas interested by the waves of uprisings since 2011-12. The book aims to uncover this new, critical centrality of the Mediterranean in the global scenario through the analysis of the interactions and intertwining of those trends and dynamics offering a historical holistic broad view. What follows is an Italian perspective that is the result of the research of a group of scholars who have been working for years on the first-hand sources of the countries examined. A peculiar vision connected not only to its unique geographical position at the center of the basin, but also to its deep relations with the southern shore throughout its long history.

*The Rule of Law in International Affairs* Ian Brownlie, 1998-08-26 This volume consists of a carefully edited version of the General Course on Public International Law delivered at the Hague Academy of International Law to commemorate the fiftieth anniversary of the foundation of the United Nations. The author brings to them not only his background of academic distinction, but his experience as a practitioner concerned with major international legal issues. The rule of law in international affairs is a question of perennial concern but it is of greater moment these days for a number of reasons. The active agenda of the Security Council and its relative solidarity creates a paradox. Its increased political power is a source of hope but the modalities of the exercise of power present problems of principle and of legal concern. Another area of concern is the International Court, which has had a successful record since the early eighties and provides one of the guarantees of the maintenance of legality. Recent successes of the Court include the effective resolution of the territorial dispute between Chad and Libya. The general level of compliance with its decisions by States is impressive. Yet its success is matched not by encouragement and enhancement of its facilities but by United Nations financial constraints which hinder its work and, ultimately, may threaten its independence in relation to the political organs of the United Nations.

**Lex Sportiva: What is Sports Law?** Robert C.R. Siekmann,Janwillem Soek,2012-01-19 The important theme “What is Sports Law?” was the topic of the international Conference on “The Concept of Lex Sportiva Revisited”, which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

**Five Faces of Modernity** Matei Călinescu,1987 Five Faces of Modernity is a series of semantic and cultural biographies of words that have taken on special significance in the last century and a half or so: modernity, avant-garde, decadence, kitsch, and postmodernism. The concept of modernity--the notion that we, the living, are different and somehow superior to our predecessors and that our civilization is likely to be succeeded by one even superior to ours--is a relatively recent Western invention and one whose time may already have passed, if we believe its postmodern challengers. Calinescu documents the rise of cultural modernity and, in tracing the shifting senses of the five terms under scrutiny, illustrates the

intricate value judgments, conflicting orientations, and intellectual paradoxes to which it has given rise. *Five Faces of Modernity* attempts to do for the foundations of the modernist critical lexicon what earlier terminological studies have done for such complex categories as classicism, baroque, romanticism, realism, or symbolism and thereby fill a gap in literary scholarship. On another, more ambitious level, Calinescu deals at length with the larger issues, dilemmas, ideological tensions, and perplexities brought about by the assertion of modernity.

*Outsourcing and Offshoring Business Services* Leslie P. Willcocks, Mary C. Lacity, Chris Sauer, 2017-07-25 Bringing together theoretical and empirical studies from the *Journal of Information Technology*, this book provides a definitive guide to research discovered on the growing global sourcing phenomenon. Paying particular attention to Information Technology Outsourcing (ITO) and Business Process Outsourcing (BPO), theoretical chapters explore insightful ways of thinking about the different facets of outsourcing, and provide useful information to practitioners and researchers. Empirical chapters report the findings of 405 major research studies into the risks and successes of relationships between customer and vendor, the development of trust in these relationships, the factors affecting locations for offshoring, and specialized offshoring organizations such as captive centres. In this comprehensive study, the editors present an expert review of the historical development of this field, and offer analysis of emerging findings and practices for the future.

*Sexual Violence in Armed Conflict* Megan Bastick, Karin Grimm, Rahel Kunz, 2007 In its first part, the Global Overview, the report profiles documented conflict-related sexual violence in 51 countries - in Africa, the Americas, Asia, Europe and the Middle East - that have experienced armed conflict over the past twenty years. The second part of the report, entitled *Implications for the Security Sector*, explores strategies for security and justice actors to prevent and respond to sexual violence in armed conflict and post-conflict situations--P. 4 of cover.

**Golden Gulag** Ruth Wilson Gilmore, 2007-01-08 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called the biggest prison building project in the history of the world. *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the three strikes law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many

cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

**Industry, Innovation and Infrastructure** Walter Leal Filho, Anabela Marisa Azul, Luciana Brandli, Amanda Lange Salvia, Tony Wall, 2021-05-05 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 9, namely "Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation" and contains the description of a range of terms, to allow a better understanding and foster knowledge about it. This book presents a set of papers on the state of the art of knowledge and practices about three important aspects of sustainable development, infrastructure, industrialization and innovation. It focuses on the support of cleaner technologies, enhanced scientific research, domestic technology development and universal internet access. Concretely, the defined targets are: Develop quality, reliable, sustainable and resilient infrastructure, including regional and transborder infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all Promote inclusive and sustainable industrialization and, by 2030, significantly raise industry's share of employment and gross domestic product, in line with national circumstances, and double its share in least developed countries Increase the access of small-scale industrial and other enterprises, in particular in developing countries, to financial services, including affordable credit, and their integration into value chains and markets Upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities Enhance scientific research, upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including encouraging innovation and substantially increasing the number of research and development workers per 1 million people and public and private research and development spending Facilitate sustainable and resilient infrastructure development in developing countries through enhanced financial, technological and technical support to African countries, least developed countries, landlocked developing countries and small island developing states Support domestic technology development, research and innovation in developing countries, including by ensuring a conducive policy environment for, inter alia, industrial diversification and value addition to commodities Significantly increase access to information and communications technology and strive to provide universal and affordable

access to the Internet in least developed countries Editorial Board Oluwabunmi Opeyemi Adejumo, Leah A Dundon, Lizhen Huang, Heather Jones, Haruna Musa Moda

*Your Sons Are at Your Service* Aaron Y. Zelin, 2020-02-11 Tunisia became one of the largest sources of foreign fighters for the Islamic State—even though the country stands out as a democratic bright spot of the Arab uprisings and despite the fact that it had very little history of terrorist violence within its borders prior to 2011. In *Your Sons Are at Your Service*, Aaron Y. Zelin uncovers the longer history of Tunisian involvement in the jihadi movement and offers an in-depth examination of the reasons why so many Tunisians became drawn to jihadism following the 2011 revolution. Zelin highlights the longer-term causes that affected jihadi recruitment in Tunisia, including the prior history of Tunisians joining jihadi organizations and playing key roles in far-flung parts of the world over the past four decades. He contends that the jihadi group Ansar al-Sharia in Tunisia was able to take advantage of the universal prisoner amnesty, increased openness, and the lack of governmental policy toward it after the revolution. In turn, this provided space for greater recruitment and subsequent mobilization to fight abroad once the Tunisian government cracked down on the group in 2013. Zelin marshals cutting-edge empirical findings, extensive primary source research, and on-the-ground fieldwork, including a variety of documents in Arabic going as far back as the 1980s and interviews with Ansar al-Sharia members and Tunisian fighters returning from Syria. The first book on the history of the Tunisian jihadi movement, *Your Sons Are at Your Service* is a meticulously researched account that challenges simplified views of jihadism's appeal and success.

*Disciplinary and Dissent in Cultural Studies* Cary Nelson, Dilip Gaonkar, 2013-10-28 First published in 1996. As recently as the early 1990s, people wondered what was the future of cultural studies in the United States and what effects its increasing internationalization might have. What type of projects would cultural studies inspire people to undertake? Would established disciplines welcome its presence and adapt their practices accordingly? *Disciplinary and Dissent in Cultural Studies* answers such questions. It is now clear that, while striking and innovative work is underway in many different fields, most disciplinary organizations and structures have been very resistant to cultural studies. Meanwhile, cultural studies has been subjected to repeated attacks by conservative journalists and commentators in the public sphere. Cultural studies scholars have responded not only by mounting focused critiques of the politics of knowledge but also by embracing ambitious projects of social, political, and cultural commentary, by transgressing all the official boundaries of knowledge in a broad quest for cultural understanding. This book tracks these debates and maps future strategies for cultural studies in academia and public life. The contributors to *Disciplinary and Dissent in Cultural Studies* include established scholars and new voices. In a series of polemic and exploratory essays written especially for this book, they track the struggle with cultural studies in disciplines like anthropology, literature and history; and between cultural studies and very different domains like Native American culture and the culture of science. Contributors include Arjun Appadurai, Michael Denning, Lawrence Grossberg,

Cary Nelson, Constance Penley, Andrew Ross, and Lynn Spigel.

**Capital and the Debt Trap** Claudia Sanchez Bajo, Bruno Roelants, 2011-08-30 The financial crisis is destroying wealth but is also a remarkable opportunity to uncover the ways by which debt can be used to regulate the economic system. This book uses four case studies of cooperatives to give an in-depth analysis on how they have braved the crisis and continued to generate wealth.

*La science de l'information : Origines, théories et paradigmes* IBEKWE-SANJUAN Fidelia, 2012-10-01 Cet ouvrage de synthèse sur les fondements théoriques et épistémologiques de la science de l'information répond à trois questions : - existe-t-il une science de l'information à part entière ? - comment se définit l'information, objet de cette science ? - y a-t-il une spécificité française de la science de l'information ? Ce livre compare les chemins parcourus par la science de l'information en France et dans le reste du monde. Il contextualise cette évolution à l'aune d'une diversité d'inscriptions disciplinaires. L'enjeu de la science de l'information est de concilier l'approche réaliste de la connaissance, l'approche individualiste des sciences cognitives et l'approche collectiviste où les domaines sont façonnés et les comportements sont modulés par les environnements, les cultures et les construits sociaux partagés. Cette étude sera utile à tous les chercheurs, étudiants et professionnels désirant approfondir leurs connaissances sur les fondements théoriques de la science de l'information.

**European Values** Pierre Bréchon, Frédéric Gonthier, 2017-04-18 Written by the team carrying out the EVS surveys in

France, this book contrasts with the popular belief that values are converging. It demonstrates that increasingly individualized value systems do not necessarily mirror a more individualistic society.

*Development Models, Globalization and Economies* John B. Kidd, Frank-Jürgen Richter, 2005-01-31 This text considers different economic models available in the global market. The US or Anglo-Saxon model is often portrayed as the best but now Asia is again on a roll. The book analyzes how these models have influenced both regional and global development, and engages in discussions upon alternatives and the search for the 'grail'.

**Inequality and Governance in the Metropolis** Jefferey M. Sellers, Marta Arretche, Daniel Kübler, Eran Razin, 2016-11-26 This book undertakes the first systematic, multi-country investigation into how regimes of place equality, consisting of multilevel policies, institutions and governance at multiple scales, influence spatial inequality in metropolitan regions. Extended, diversified metropolitan regions have become the dominant form of human settlement, and disparities among metropolitan places figure increasingly in wider trends toward growing inequality. Regimes of place equality are increasingly critical components of welfare states and territorial administration. They can aggravate disparities in services and taxes, or mitigate and compensate for local differences. The volume examines these regimes in a global sample of eleven democracies, including developed and developing countries on five continents. The analyses reveal new dimensions of efforts to grapple with growing inequality around the world, and a variety of institutional blueprints to address one of the most daunting challenges of twenty-first century governance.

**Art in the Anthropocene** Etienne Turpin, Dr Heather Davis, 2015-06-11 Taking as its premise that the proposed epoch of the Anthropocene is necessarily an aesthetic event, this collection explores the relationship between contemporary art and knowledge production in an era of ecological crisis. Art in the Anthropocene brings together a multitude of disciplinary conversations, drawing together artists, curators, scientists, theorists and activists to address the geological reformation of the human species. With contributions by Amy Balkin, Ursula Biemann, Amanda Boetzkes, Lindsay Bremner, Joshua Clover & Juliana Spahr, Heather Davis, Sara Dean, Elizabeth Ellsworth & Jamie Kruse (smudge studio), Irmgard Emmelhainz, Anselm Franke, Peter Galison, Fabien Giraud, & Ida Soulard, Laurent Gutierrez & Valerie Portefaix (MAP Office), Terike Haapoja & Laura Gustafsson, Laura Hall, Ilana Halperin, Donna Haraway & Martha Kenney, Ho Tzu Nyen, Bruno Latour, Jeffrey Malecki, Mary Mattingly, Mixrice (Cho Jieun & Yang Chulmo), Natasha Myers, Jean-Luc Nancy & John Paul Ricco, Vincent Normand, Richard Pell & Emily Kutil, Tomas Saraceno, Sasha Engelmann & Bronislaw Szerszynski, Ada Smailbegovic, Karolina Sobecka, Richard Streitmatter-Tran & Vi Le, Anna-Sophie Springer, Sylvere Lotringer, Peter Sloterdijk, Zoe Todd, Etienne Turpin, Pinar Yoldas, and Una Chaudhuri, Fritz Ertl, Oliver Kellhammer & Marina Zurkow. *The World Bank* Eric Toussaint,2008 Widely viewed with suspicion as the international economic arm of the U.S. government,the World Bank has become overwhelmingly powerful. Eric Toussaint gives a highly readable account of how this happened. In concise chapters he shows how the bank operates, who funds it, and what it sets out to promote. The World Bank's avowed purpose is to grant loans to the independent states of the developing world, to help them on their journey to recovery after colonial occupation. In reality, the conditions imposed on these states including enforced privatization of all public services, and enforced neo-liberal rules on trade mean that the Bank has become the new colonial authority in everything but name. This ambitious and critical study is a perfect book for anyone looking for a comprehensive history of the Bank and its role in world affairs. ERIC TOUSSAINT is president of the Committee for the Abolition of Third World Debt and is a fellow and frequent lecturer at the International Institute for Research and Education in Amsterdam. He is the co-author of *Who Owes Who? 50 Questions About World Debt*.

**Bankocracy** Eric Toussaint,2015-11-02 Governments of the most industrialised countries have dramatically increased their public debt to bail out the private banks after the most disastrous economic and financial meltdown in capitalist history since the 1930s. Paying debts and reducing fiscal deficits have become the perfect pretexts to enforce austerity measures everywhere. The Troika (European Commission, ECB and IMF) and all EU governments have launched an unprecedented attack on people's social and economic rights. This book will enable the reader to understand how the crisis developed: the consequences of deregulating the banking system, the logic underpinning private banks' responses, and the crimes they perpetrate on a daily basis with the collusion of governments and central banks. It argues for socialisation, rather than 'nationalisation', of the banking sector so that it becomes a proper public service under citizen control and monitoring. It argues for the cancellation of illegitimate public debt that largely results from bank bail-outs. It uses simple straightforward language to make it possible for anyone to understand the current crisis and see coherent alternatives to the current policies.
