The following Royal Warrants are amongst many alluded to in this Volume, and have been selected as those which have most affected the organization of the Corps. The pages on which they have severally been quoted are given to guide the reference. Vide page 172. George E. Whereas it hath been humbly represented unto Us that the Establishment of Twenty-nine Engineers on the Quarter Books of Our Office of Ordnance, formed by Order of his late Majesty Our Royal Predecessor, in Council dated the 22nd Day of August, 1717, is much too small to answer the Several Purposes Our Service doth and may from time to time require. Our Will and Pleasure therefore is, That you cause Eight Practitioner Engineers to be added to the said Establishment of Engineers, at an allowance of Three Shillings f diem each, to be made to them on the Quarter Books of Our said Office of Ordnance; The same to commence from the First day of January next, which we do hereby Establish accordingly. And Our further Will and Pleasure is, That you cause the pay of the said Eight Practitioner Engineers, amounting to Four Hundred and Thirty Eight Pounds per Annum, to be added to the Annual Charge of the Ordinary of Our Office of Ordnance and to be inserted in your Estimates to

be presented from Time to Time to Parliament. And for so doing, this shall be, as well to you as to the Auditors of Our Imprests and all other Our Officers and Ministers herein concerned, a sufficient Warrant. Given at Our Court at St. James's, the Sixteenth Day of December, 1755, in the Twenty-Ninth Year of Our Reign. By His Majesty's Command, HOLDERNESSE. **History of the Corps of Royal Engineers, Vol. 1 (Classic Reprint)** Whitworth Porter, 2015-07-10 Excerpt from History of the Corps of Royal Engineers, Vol. 1 It seems somewhat strange that no history of the Corps of Royal Engineers should have been as yet presented to the public. For nearly two centuries, since the date when the officers of this service were first united into a compact body, their career has been intimately connected with the military history of the Empire, and even long before that time they had as individuals gained renown in the important functions which in those earlier days they fulfilled. In spite of this vast accumulation of faithful service no connected account exists, and it has been left to those who are interested in the subject to grope amidst a mass of mouldering records, to exhume here and there isolated facts bearing on the subject. Other regiments have long since found their biographers, the result of whose labours has been the formation of an admirable encyclopaedia of military history. The student looks, however, in vain amongst these for any narrative of the services of the engineers. The cause of this hiatus may possibly be thus explained. It seems clear that the task should fall to the lot of one who has had intimate relations with the Corps, and whose experience in connection with it would enable him to treat the subject adequately; but such a man, whilst in the active exercise of his profession, has not sufficient time available for the lengthened and laborious research necessary for the undertaking. Hitherto, engineers have generally clung to the service until old age or infirmity has compelled them to seek repose in retirement. They have consequently been unwilling and, indeed, physically unable afterwards to attempt such a work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. **Honourable Conquests** A.J. Smithers, 1998-11-12 The origin of the Corps of Royal Engineers, now affectionately known as The Sappers but then as the King's Military Engineers, has been traced as far as 1414, though it was not until 1716 that a permanent officer corps of engineers was established by the Board of Ordnance with the title Corps of Engineers. Being part of the Regular Army it is hardly surprising that the Corps should be associated in the public mind with such tasks as building roads, bridges and defensive works or breaching those of the enemy and scant attention was hitherto been paid to the remarkable achievements of the Corps in times of peace. In *Honourable Conquests* A.J. Smithers sets out to redress that balance. Britain having acquired an Empire, more by accident than design, it fell to the lot of the Army, first in India and later in other parts of the Empire, to act in the role of unofficial Colonial Policemen. As well we all know, the policeman's lot is not a happy one, so the ingenious Engineers found better ways to pass the time, thereby leaving behind them some remarkable testimonies, not only to their professional skills but to their very considerable contribution to the welfare of mankind- in India, in Canada, in Australia and other parts of the Empire. It is to such men as General Pasley Colonel By, General Cotton and Sir Colin Scott Moncrieff, truly great men now all but forgotten, on whom Smithers turns his narrative skill and wry humour in this fascinating book. As the completion of the Channel Tunnel approaches, his penultimate chapter concerning the involvement of the Royal Engineers with that project over a hundred years ago will be of particularly topical interest.
