Schriften zur Sprache und Literatur IV TAHİR BALCI ,ALİ OSMAN ÖZTÜRK ,MUNİSE AKSÖZ, Mit diesem Band der jährlichen Buchreihe "Schriften zur Sprache und Literatur / Dil ve Edebiyat Yazıları" möchten wir einerseits die Arbeiten von erfahrenen Wissenschaftlern bzw. Lehrkräften erreichbar machen, andererseits zielen wir darauf ab, NachwuchswissenschaftlerInnen zur Hervorbringung wissenschaftlicher Texte zu inspirieren. In diesem Sinne möchten wir besonders die Beiträge der Masterstudenten und Doktoranden hervorheben, die ihre in den Lehrveranstaltungen und Seminaren erworbenen Kenntnisse mit ihrer Erzeugungskraft verbunden und veranschaulicht haben. Die Arbeiten anderer,

an verschiedenen Universitäten tätiger Lehrkräfte sind für solche, die sich mit verschiedenen Disziplinen wie Linguistik, Literatur, Literaturwissenschaft, Übersetzungswissenschaft, Kulturwissenschaft, Soziolinguistik, Psycholinguistik und Fremdsprachendidaktik beschäftigen, wegweisend. Wegweisend in dem Sinne, dass sie vielfältig sind und eine reiche Palette neuer Gesichts- bzw. Standpunkte aufweisen. Die Beiträge stammen nicht nur aus dem Bereich der Germanistik im weitesten Sinne; unser Band enthält auch Arbeiten, die sich - wenn auch indirekt - auf die Anglistik, Arabistik und Turkologie beziehen. Durch diese Vielfalt wird ein großer Leserkreis erreicht, der eine lange Reise in wissenschaftliche Nachbardisziplinen unternehmen und somit mehrere Themen abschmecken kann.

Language Teaching and the Older Adult Danya Ramírez Gómez, 2016-09-15 The aging of the population and the increasing number of older adults pursuing foreign language courses call for a greater understanding of the ways in which these individuals learn foreign languages. This book offers a pioneering contribution to the literature on foreign language education for older adults (aged 60 and over), termed foreign language geragogy. It details an empirical, multidisciplinary study on Japanese older learners of Spanish and focuses on the influence of learning experiences on vocabulary learning strategy use. It discusses the constraints that preconceptions impose on learners, researchers, instructors and administrators, and it offers a set of practical recommendations for foreign language activities for elderly individuals. It also introduces the notion of 'learner re-training', an instructional mechanism that contributes to older learners' self-acknowledgment and autonomy development in foreign language learning. The book is directed at teachers and trainee teachers of foreign languages to older adults, and also at education professionals and researchers in the field of foreign language learning in general.

A Valency Dictionary of English Thomas Herbst, David Heath, Ian F. Roe, Dieter Götz, 2013-02-06 This dictionary provides a valency description of English verbs, nouns and adjectives. Each entry contains a comprehensive list of the complementation

patterns identified on the basis of the largest corpus of English available at the present time. All examples are taken directly from the COBUILD/Birmingham corpus. The valency description comprises statements about the quantitative valency of the lexical units established, an inventory of their obligatory, contextually optional and purely optional complements as well as systematic information on the semantic and collocational properties of the complements. An outline of the model of valency theory used in this dictionary is provided in the introduction.

The Meaning of Particle/prefix Constructions in German Robert B. Dewell, 2011 This is really two books in one: a valuable reference resource, and a groundbreaking case study that represents a new approach to constructional semantics. It presents a detailed descriptive survey, using extensive examples collected from the Internet, of German verb constructions in which the expressions *durch* ('through'), *über* ('over'), *unter* ('under'), and *um* ('around') occur either as inseparable verb prefixes or as separable verb particles. Based on that evidence, the author argues that the prefixed verb constructions and particle verb constructions themselves have meaning, and that this meaning involves subjective construal processes rather than objective information. The constructions prompt us to distribute focal attention according to patterns that can be articulated in terms of Talmy's notion of 'perspectival modes'. Among the other topics that play an important role in the analysis are incremental themes, reflexive trajectors, fictive motion, 'multi-directional paths', and 'accusative landmarks'.

Teaching As A Reflective Practice Ian Westbury,Stefan Hopmann,Kurt Riquarts,2012-08-06 This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition, newly prepared essays by German scholars and practitioners writing from within the tradition, and interpretive essays by U.S. scholars. It brings this tradition, which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany--and which is now experiencing a renaissance--to the English-speaking world, where it has been essentially unknown. The intent is to capture in one volume the core (at least) of the tradition of Didaktik and to communicate its potential relevance to English-language curricularists and teacher educators. It introduces a theoretical tradition which, although very different in almost every respect from those we know, offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis (the core focus of the tradition) which the editors believe are accessible to North American readers--with appropriate translation. These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals. By raising the possibility that the new tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse--and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing, this book opens up a gold mine of theoretical and practical possibilities.

My Beautiful Birds Suzanne Del Rizzo,2017-03-01 Behind Sami, the Syrian skyline is full of smoke. The boy follows his family and all his neighbours in a long line, as they trudge through the sands and hills to escape the bombs that have destroyed their homes. But all Sami can think of is his pet pigeons - will they escape too? When they reach a refugee camp and are safe at last, everyone settles into the tent city. But though the children start to play and go to school again, Sami can't join in. When he is given paper and paint, all he can do is smear his painting with black. He can't forget his birds and what his family has left behind. One day a canary, a dove, and a rose finch fly into the camp. They flutter around Sami and settle on his outstretched arms. For Sami it is one step in a long healing process at last. A gentle yet moving story of refugees of the Syrian civil war, My Beautiful Birds illuminates the ongoing crisis as it affects its children. It shows the reality of the

refugee camps, where people attempt to pick up their lives and carry on. And it reveals the hope of generations of people as they struggle to redefine home.

Handbook of Intellectual Styles Li-fang Zhang,Robert J. Sternberg,Stephen Rayner, PhD,2012 [B]ecause of the thoroughness of the literature reviews and the comprehensive coverage of the chapter topics, [this book] should be required reading for any scholar working in related areas of personality or intelligence.--PsycCRITIQUES This book is a masterly attempt to bring order and cohesion to a field that for many years has been riven with claims and counterclaims. The editors and authors are to be congratulated for addressing a very complex task so helpfully. John Biggs, PhD Honorary Professor of Psychology University of Hong Kong If you are interested in intellectual stylesópeople's preferred ways of processing informationóthen this book belongs on your bookshelf. Richard E. Mayer, PhD Professor of Psychology University of California, Santa Barbara For more than half a century, the construct of styleówhether designated as cognitive, thinking or learningóhas been in or out of fashion in the history of psychology and education. The editors of the present Handbook have invigorated the style construct in the form of intellectual styles, and have brought together a distinguished international panel of chapter authors who offer up-to-date surveys of the assessment, development, correlates, and educational and organizational applications of intellectual styles. For those seeking to familiarize themselves with current theory and research in an intellectually exciting field, the present Handbook is essential. Nathan Kogan, PhD Professor Emeritus, Department of Psychology New School for Social Research, New York, NY The concept of intellectual styles has had a controversial history based on diverse philosophical and theoretical foundations. Most recently, the idea of intellectual stylesóan umbrella term that covers such closely related constructs as cognitive styles, learning styles, teaching styles, and thinking stylesóhas gained momentum as an explanation for why different people succeed in different professional and organizational settings. Previously, it was thought that high-achievers simply had more innate abilities than their less successful peers, but research has shown that individuals have different intellectual styles that are better suited for varying types of contexts and problems. Based on the most current and expansive research, this handbook is the first to provide a comprehensive review of research on the construct of intellectual style, from its foundations and development, to its relations to allied constructs, its roles in school and job performance, its applications in various populations, and its future.. This understanding of intellectual styles as a valid concept for both individuals and groups has far-reaching implications for researchers in cross-cultural psychology, multicultural education, organizational behavior and work performance, and many other academic disciplines, as well as practitioners in education and beyond. Key Features: Provides a comprehensive review of intellectual styles from multiple perspectives Written for students and scholars in diverse academic arenas, as well as practitioners in education and other fields Includes contributions from researchers from diverse disciplines, such as

psychology, business, education, and health sciences

Second Language Research Methods : H. W. Seliger, Elana Shohamy, 2013-09-27 Based on a set of four research parameters, this book discusses the development of research questions and hypotheses, naturalistic and experimental research, data collection, and validation of research instruments. Each chapter includes examples and activities.

Technology and Vocational Education for Sustainable Development Margarita Pavlova, 2008-12-14 Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including “self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one’s values, capable of fighting for one’s rights, independence, own decision making, being free, awakening, and capability” (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of “gaining power and control over decisions and resources that determine the quality of one’s life” (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on “agents”; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as “an actor’s or group’s ability to make purposeful choices - that is, the actor is able to envisage and purposively choose options” (p. 11).
